

Meeting Agenda – Oct.21st

Recap / Scrum Meeting (15 minutes):

Goal: discuss what has happened in the past 3 weeks, and what Sam and Annie have done last week

1. **The progress we have up until now:** All the data are organized and stored in array; Sam tried to clean up Lucy's code for crawling but it's not scraping the data for us. If we have time in the future, we need to figure out why that's the case.
2. **What we really need to accomplish during today's meeting:** Getting Firebase set up and connected to our app. Import the information into Firebase.

Setting up Firebase and importing data (3 hours):

Goal: connect our app to Firebase and write data into the database

Research on login (Facebook SDK) (Remaining Time):

Goal: leave with an idea of how to set up login

Timeline:

Oct 21st: **Data Acquisition must be done** ←

Oct 28th: **Needs to have an idea of how to do Login**

Nov 4th: **Login continued**

Nov 11th: **Login (without Facebook) must be done for presentation**

Nov 18th: **Presentation**
